

COLLEGE OF APPLIED LIFE STUDIES

There were 163 beginning freshmen enrolled in the College of Applied Life Sciences in the Fall of 2001: 69 males and 94 females. Of these students, 158 had both HSPR and ACT:C. The persistence rates for the latter group are described in the table below. Each cell represents the number of students in the cell with that particular combination of HSPR and ACT:C. The percentage in that cell represents the percent of students who were enrolled as of the tenth day of Fall 2002.
