

Enrollment of Students with Disabilities

State legislation, which requires the Board of Higher Education to monitor the participation of specific groups of individuals in public colleges and universities, identifies "handicapped" students as one of the groups to be monitored. Rehabilitation professionals now more commonly use the term "disabled" in place of "handicapped."

State legislation does not provide a definition of students with disabilities. For this purpose, a frequently cited source is Section 706(8)(A) of Title 29 of the United States Code, which defines a disabled person as "any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such an impairment." This section specifically excludes individuals with problems of alcohol and/or drug abuse from this definition.

In collecting information for the institutional plan, it will be necessary to expand further upon this federal definition in order to allow for identification of the range of disabilities existing on campus. Include within the count of disabled students those individuals who are functionally quadriplegic (that is, use power wheelchairs), functionally paraplegic (use manual wheelchairs), blind/visually impaired, and deaf/hearing impaired. Also, include individuals with other mobility impairments (for instance, those requiring the use of braces or other prosthetic devices); individuals with chronic health problems, such as cardiac or respiratory diseases, and/or head injuries; individuals who have documented, diagnosed learning disabilities, and those other individuals whose disabilities require special institutional assistance.

Using the above definition, indicate in the lines below the undergraduate and graduate/professional enrollment of students with disabilities for the fiscal year preceding the date for submission of the report. Also, indicate how the enrollment count was derived, that is, whether it is an estimate of the institution's disabled student enrollment or a count of the number of students with disabilities receiving services from the institution.

FY2001 Undergraduate Enrollment of Students with Disabilities 79

FY2001 Graduate/Professional Enrollment of Students with Disabilities 42

The above enrollment count is: (please check one)

- a) estimate of the number of disabled students at the institution
- b) count of the number of students receiving services at the institution X
