EXPLANATORY NOTES FOR RETENTION AND GRADUATION

Graduation and retention rates are the result of many variables including academic performance, academic preparation, motivation, and academic integration. Other factors which seem to influence graduation and retention include part/full-time attendance, student age, family responsibilities, commuter/resident attendance, first-generation college attendance, socioeconomic status, employment, and indebtedness. The extent to which these factors combine and contribute to graduation and retention is not fully understood, but there is a considerable body of research which has documented the complexities of the issue.

Throughout recent history the graduation rate of students in the United States who enter a university as beginning freshmen and earn bachelor's degrees from that same university four to six years later is approximately 50 percent. A freshman class with higher average ability, motivation, preparation, greater full-time attendance, etc. will graduate at higher rates than that average. The reverse is also true.

However, there are no hard and fast prediction models. The intervening variables are numerous and interrelated. For example, high motivation certainly can overcome under-preparedness just as low motivation can negate high ability. Better academic preparation may be the result of high academic ability or the consequence of higher socioeconomic status and thus a more positive high school environment.

It is tempting to compare institution-wide graduation rates among universities without accounting for the makeup of the student body. The reader is cautioned not to make blanket comparisons, for example, in the graduation and retention rates provided in this Data Book for the University of Illinois campuses. The student bodies of the campuses are different, and thus comparisons among the three would parallel the proverbial apples-to-oranges relationship.

One other caveat should be emphasized: Retention data presented in this and in previous Data Books were gathered from several different studies, each employing a slightly different methodology. The footnotes section of each table describes the definitions used for that table.

Campus Enrollments

UIS

HIGHLIGHTS

Total headcount enrollment at Springfield, 4,334, is lower for the third year after the high point of the decade in 1995. Undergraduate enrollment peaked in 1992 with a gradual decline since then, but new undergraduates are up slightly since last year. New graduate enrollment is substantially lower than in previous years, though enrollment of continuing students numbers the highest in the period. See Tables 24-25 and Figure 20.

Enrollment is divided at 2,373 undergraduates, 1,938 graduates, and 23 doctoral students.

Comparing fall 1998 to fall 1988, new undergraduates are almost constant in number, but new graduate enrollment dropped in number as well as in a percent of the total. See Table 25.

Table 26 shows large increases in undergraduate enrollment in the Colleges of Liberal Arts and Sciences and Public Affairs and Administration compared to 1988. The College of Liberal Arts and Sciences increased by the largest number of undergraduates, but some of the increase is due to programs being moved out of Health and Human Development Sciences and into LAS. See Figure 21. The College of Public Affairs and Administration shows the highest percent increase at 70 percent.

Fall 1998 enrollment by college by gender by level is displayed on Table 27 and ten-year trends by gender and level are shown in Table 28 and Figures 22-23. Campus-wide, female students have outnumbered male students throughout the period. Currently, female students represent 62 percent of students.

Over the last ten years, Black undergraduate enrollment has increased both in number and as a percent of total, from 128 to 163 students and from 5.7 to 6.9 percent of the total. At the Master's level, there have been greater increases in Black student enrollment and representation; the number is over 65 percent higher than the start of the period. See Tables 29-30 and Figures 24-25. This fall a doctorate was introduced at UIS. The students in the program are quite diverse—a quarter of the 23 students are African American.

Figures 26 and 27 display the geographic distribution of Illinois students at UIS. Some 80 counties in Illinois are represented, though most students reside in Sangamon County at the time of their application. Table 31 shows that the student body includes 101 international students representing 24 different countries.

New Student Characteristics

UIS

HIGHLIGHTS

- . *Except for two years in the early nineties, total new transfer enrollment has remained at about 600 students.*
- . *Since last year, enrollment dropped in two colleges and rose in the other two. See Table 32.*
- . *Table 33 displays selected demographic statistics of the fall 1998 new undergraduate students. Nearly 30 percent of these students are age 30 or more while just over a third are age 20-21. Most are female and White and transfer from Lincoln Land College. Three out of every five students are enrolled full time.*
- . *The new graduate student cohort is older and somewhat more diverse in race/ethnicity than new undergraduate transfers. Fifty-three percent are part-time students, and the mix by gender is more female than male. See Table 34.*
- . *The map in Figure 29 shows the number of new undergraduate students by the Illinois community college from which they transferred. Students transferred from all but about 10 of the community colleges. Lincoln Land is the largest feeder, at 197 students in fall 1998. It is followed by Illinois Central at 60 and Springfield College at 29.*

¹ In 1994, Labor Relations moved from the School of Business and Management to the School of Public Affairs and Administration.

² Clinical Laboratory Sciences and Psychology moved from the School of Health and Human Sciences to the School of Liberal Arts and Sciences 1997.

³ Previous to 1993, the definition of new non-degree seeking students may have varied. The totals displayed in this table may not agree with other sources or with other tables in this publication.

⁴ The 52 transfers enrolled in CLS and Psych. in 1988 have been subtracted from HHS and added to LAS for 1988, to allow an accurate comparison between 1988 and 1998 enrollment figures.

Academic Performance

UIS

HIGHLIGHTS

Table 35 reflects the extended attendance patterns of undergraduates at UIS. In the fourth year after matriculation, over 10 percent of the students, who began at UIS primarily as juniors, are still enrolled. After eight years, between 50 and 58 percent have graduated and some 3 percent are still enrolled.

Retention rates by school vary from year to year, but a snapshot of a single class shows a five-year graduation rate for the 1989 cohort of 51 percent in the College of Business and Management, 58 percent in the College of Health and Human Services, 60 percent in the College of Liberal Arts and Sciences, and 54 percent in the College of Public Affairs and Administration.

FY 1992 - FY 1994 graduates are aggregated in the display on Table 37 by the major in which they entered and the one in which they earned a degree. The vast majority of students earn a degree in the same major in which they begin at UIS. Of those who do change majors, the net movement shows that students more often move to Child, Family, and Community Services; English; and Economics.

Fall beginning transfers include new full-time and part-time students entering either in the fall or summer preceding the fall term. The cohort includes degree-seeking students only; however, the definition used in this table (and in the next table, Table 36) is more inclusive than displayed in the other sections of this publication. Also please note that Table 35 includes degree-seeking students who are not enrolled in a college (undecided), while Table 36 excludes these students. "Enrolled" includes students enrolled anytime during the entire fiscal year; these data do not portray a snapshot of fall term enrollment only. Degrees granted during the summer term are counted with the subsequent fall. Thus, a student earning a baccalaureate degree in the summer following the second year after matriculation would be counted as graduated in the third year.

Table 35 illustrates that some students at UIS are enrolled well beyond the traditionally expected two years for junior-level transfers. For example, four years after entering UIS, between 10 and 15 percent of the cohort are still enrolled. Eight years after entering, some 3 to 4 percent are still enrolled. Graduation rates after eight years range from 50 to 58 percent for the 1984 through 1989 cohorts.

The following graph depicts the percentage still enrolled, graduated, and no longer enrolled of the 1990 cohort for the second through sixth years following matriculation. After two years, nearly 20 percent of the students graduated, with over 51 percent enrolled. By the sixth year following matriculation, 52 percent of the cohort had graduated, and almost 7 percent were still enrolled.

Degrees Conferred

UIS

HIGHLIGHTS

- In FY 1998, UIS awarded 923 degrees--618 bachelor's degrees and 305 master's degrees. The total is one of the highest levels in the ten-year period. The number of master's degrees is down from the high point in 1996 but higher than the years before that time. See Table 38 and Figure 31.*
- Like enrollment levels, more degrees are awarded in Liberal Arts and Sciences than in the other colleges, at both the master's and bachelor's levels.*
- Females receive the majority of degrees awarded in every college and at each level, except for master's degrees awarded in the Colleges of Business and Management and Public Affairs and Administration.*
- White students have received nearly 90 percent of the degrees awarded at Springfield in the last ten fiscal years. Table 40 shows that the largest minority, Black students, earned over 7 percent of all degrees in FY 1998, up from a low of just over 4 percent in the early nineties.*

Table 38

**Percent Change in UIS Degrees Conferred
by Level and College³
FY 1988 and FY 1998**

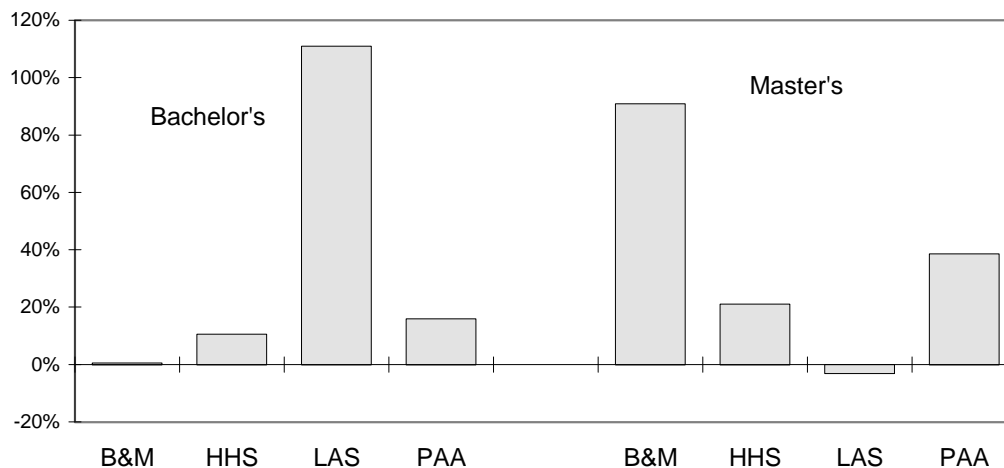

Figure 31

¹ In 1994, Labor Relations moved from the School of Business and Management to the School of Public Affairs and Administration.

² In 1997, Clinical Laboratory Sciences and Psychology moved from the School of Health and Human Services to the School of Liberal Arts and Sciences.

³ The 48 degrees conferred in CLS and Psych. in 1988 have been subtracted from HHS and added to LAS for 1988, to allow an accurate comparison between 1988 and 1998 degrees conferred.
