Campus Enrollments

UIS

HIGHLIGHTS

- *Total headcount enrollment at Springfield, 3,942, is lower for the fifth year after the high point of the decade in 1995. Undergraduate enrollment peaked in 1992 at 2,740, with a gradual decline since then to the current level of 2,118. New graduate enrollment is substantially higher this year than the previous two years, though enrollment of continuing graduate students is at one of the lowest points in the time span. See Tables 24-25 and Figure 20.*
- *Enrollment is divided at 2,118 undergraduates, 1,803 graduates, and 21 doctoral students.*
- *Table 26 shows large increases in undergraduate enrollment in the Colleges of Liberal Arts and Sciences and Public Affairs and Administration compared to 1990. The College of Liberal Arts and Sciences increased by the largest number of undergraduates, but some of the increase is due to programs being moved out of Health and Human Development Sciences and into LAS. See Figure 21.*
- *Fall 2000 enrollment by college by gender by level is displayed on Table 27 and ten-year trends by gender and level are shown in Table 28 and Figures 22-23. Campus-wide, female students have outnumbered male students throughout the period. Currently, female students represent 61 percent of students.*
- *Undergraduate enrollment of Black students increased into the mid-nineties, then declined in number but remained relatively stable in percent. The high point was in 1995 at 192 students and 7.6 percent of the total, and the current level is 157 students and 7.4 percent. At the Master's level, the campus has seen substantial increases in Black student enrollment and representation; the number is now 152 students (8.4 percent) from a low of 84 students (4.7 percent). See Tables 29-30 and Figures 24-25. In 1998 a doctorate was introduced at UIS. The students in the program are quite diverse—over a quarter of the 21 students are African American.*
- *Figures 26 and 27 display the geographic distribution of Illinois students at UIS. Over 80 counties in Illinois are represented, though most students reside in Sangamon County at the time of their application. Table 31 shows that the student body includes 110 international students representing 28 different countries.*

New Student Characteristics

UIS

HIGHLIGHTS

- *Over the past ten-year period, new undergraduate enrollment moved from a high of 814 students in 1992 to a low of 481 last fall; this fall 552 new transfers enrolled. From 1990 to 2000 Liberal Arts and Sciences showed a large increase of almost 175 percent. With the closing of the Nursing program, the College of Health and Human Services experienced a decline of about 90 percent. See Table 32.*
- *Table 33 displays selected demographic statistics of the fall 2000 new undergraduate students. Somewhat more than a quarter of these students are age 30 or more compared to a third in 1995. Two-thirds are female, almost 90 percent are White, and one-third transfer from Lincoln Land College. Three out of every four students are enrolled part time.*
- *The new graduate student cohort is older and somewhat more diverse in race/ethnicity than new undergraduate transfers. Nearly three-quarters are part-time students, and the mix is more evenly divided between males and females. See Table 34.*
- *The map in Figure 29 plots the number of new undergraduate students in 2000 by the Illinois community college from which they transferred and Table 35 shows the three-year trend in new undergraduate enrollment by transfer institution. Students transferred from all but about 10 of the community colleges in 2000. Lincoln Land is the largest feeder at 177 students, followed by Illinois Central at 49 and Richland at 35.*

Academic Performance

UIS

HIGHLIGHTS

- *Table 36 reflects the extended attendance patterns of undergraduates at UIS. In the fourth year after matriculation, from 10 to 16 percent of the students, who begin at UIS primarily as juniors, are still enrolled. After eight years, between 49 and 58 percent graduate and some 3 percent are enrolled.*
- *Retention rates by school vary from year to year, but a snapshot of a single class shows a five-year graduation rate for the 1989 cohort of 51 percent in the College of Business and Management, 58 percent in the College of Health and Human Services, 60 percent in the College of Liberal Arts and Sciences, and 54 percent in the College of Public Affairs and Administration. See Table 37.*
- *FY 1992 - FY 1994 graduates are aggregated in the display on Table 38 by the major in which they entered and the one in which they earned a degree. The vast majority of students earn a degree in the same major in which they begin at UIS. Of those who do change majors, graduates more often move to Child, Family, and Community Services; English; or Economics.*

Fall beginning transfers include new full-time and part-time students entering either in the fall or summer preceding the fall term. The cohort includes degree-seeking students only; however, the definition used in this table (and in the next table, Table 36) is more inclusive than displayed in the other sections of this publication. Also please note that Table 35 includes degree-seeking students who are not enrolled in a college (undecided), while Table 36 excludes these students. "Enrolled" includes students enrolled anytime during the entire fiscal year; these data do not portray a snapshot of fall term enrollment only. Degrees granted during the summer term are counted with the subsequent fall. Thus, a student earning a baccalaureate degree in the summer following the second year after matriculation would be counted as graduated in the third year.

Table 35 illustrates that some students at UIS are enrolled well beyond the traditionally expected two years for junior-level transfers. For example, four years after entering UIS, between 10 and 15 percent of the cohort are still enrolled. Eight years after entering, some 3 to 4 percent are still enrolled. Graduation rates after eight years range from 49 to 58 percent for the 1984 through 1991 cohorts.

The following graph depicts the percentage still enrolled, graduated, and no longer enrolled of the 1990 cohort for the second through sixth years following matriculation. After two years, nearly 20 percent of the students graduated, with over 51 percent enrolled. By the sixth year following matriculation, 52 percent of the cohort had graduated, and almost 7 percent were still enrolled.

Degrees Conferred UIS

HIGHLIGHTS

- *In FY 2000, UIS awarded 960 degrees--646 bachelor's degrees and 314 master's degrees. The total is the second highest level in the ten-year period. The number of master's degrees is down from the high point in 1996 but substantially higher than before that fall. See Table 39 and Figure 31.*
- *Like enrollment levels, Liberal Arts and Sciences posted a larger ten-year increase than did the other colleges at the bachelor's level, while Public Affairs and Administration granted the largest number of master's degrees in 2000 and Health and Human Services saw the largest percent gain over the ten-year period in master's degrees. See Table 40.*
- *Table 40 also shows degree conferred by gender. Females receive the majority of degrees awarded in every college and at each level, except for master's degrees awarded in the College of Business and Management.*
- *White students received just less than 90 percent of the degrees awarded at Springfield in the last ten fiscal years. Table 41 shows that the largest minority, Black students, earned over 6 percent of all degrees in FY 2000, up from a low of just over 4 percent in the early nineties.*
