EXPLANATORY NOTES FOR RETENTION AND GRADUATION

Graduation and retention rates are the result of many variables including academic performance, academic preparation, motivation, and academic integration. Other factors which seem to influence graduation and retention include part/full-time attendance, student age, family responsibilities, commuter/resident attendance, first-generation college attendance, socioeconomic status, employment, and indebtedness. The extent to which these factors combine and contribute to graduation and retention is not fully understood, but there is a considerable body of research documenting the complexities of the issue.

Throughout recent history the graduation rate of students in the United States who enter a university as beginning freshmen and work toward bachelor's degrees from that same university four to six years later is approximately 50 percent. A freshman class with higher than average ability, motivation, preparation, and greater full-time attendance, etc., will graduate at higher rates than that average. The reverse is also true.

However, there are no hard and fast prediction models. The intervening variables are numerous and interrelated. For example, high motivation certainly can overcome under-preparedness just as low motivation can negate high ability. Similarly, better academic preparation may be the result of high academic ability, or it may be the consequence of higher socioeconomic status, and thus a more positive high school environment.

It is tempting to compare institution-wide graduation rates among universities without accounting for the makeup of the student body. The reader is cautioned not to make blanket comparisons, for example, in the graduation and retention rates provided in this Data Book for the University of Illinois campuses. The student bodies of the campuses are different, and thus comparisons among the three would parallel the proverbial apples-to-oranges relationship.

One other caveat should be emphasized: Retention data presented in this and in previous Data Books were gathered from several different studies, each employing a slightly different methodology. The footnotes section of each table describes the definitions used for that table.

Campus Enrollments

UIC

HIGHLIGHTS

- *Fall 2004 total enrollment (excluding medical residents) on the Chicago campus numbers 24,407, down over 800 students since last year and at the lowest point in the decade. See Table 1 and Figure 1.*
- *With 2,716 students, beginning freshmen are down slightly from recent years when the campus enrolled record-breaking classes. To compensate for the large freshman classes of 2002 and 2003, new transfer numbers are considerably lower; 1,386 transfers in 2004 compared to a high of over 2,000. The number of continuing students (11,151) returned to the same level as before 2003. Total undergraduate enrollment (15,448) is down about 1,100 students from the decade-high point in 2002. See Table 2 and Figure 2.*
- *Most colleges have seen relatively stable enrollments over the past ten years; however, each has seen year-to-year variation. See Table 3 and Figure 3.*
- *Graduate I enrollment, master's students, is down from the past two years of high numbers, while graduate II enrollment, doctoral students, is similar to last year. Both are up from ten years ago. See Table 4.*
- *Tables 5-6 and Figures 4-7 illustrate that in each of the past ten years, there are more female than male undergraduate and graduate students. At the professional level, females have outnumbered males since 2001.*
- *Undergraduate Hispanic enrollment has been stable at about 16 to 17 percent of the total. Enrollment of Asian/Pacific Islander students has climbed steadily to nearly one-quarter of undergraduates. The proportion of Black students has decreased slowly over the period to 8.9 percent in 2004. At the graduate level, over the decade the proportion of Black and Asian students rose then dropped to previous levels, while the proportion of Hispanic students rose then leveled off. See Tables 7-8 and Figures 8-9.*
- *Two new tables (9 and 10) show the distribution by college, gender, and race/ethnicity. The colleges of Engineering, Business Administration, and LAS enroll over one quarter Asians; Education enrolls the highest percentage of Hispanics; and Social Work the largest percentage of Blacks.*
- *The maps in Figure 13 illustrate geographic residency. Over 97 percent of undergraduates are Illinois residents, while the graduate and professional cohorts are less concentrated in the State (76 percent). The geographic origin of international students is displayed in Table 11; international students come primarily from India and the People's Republic of China.*

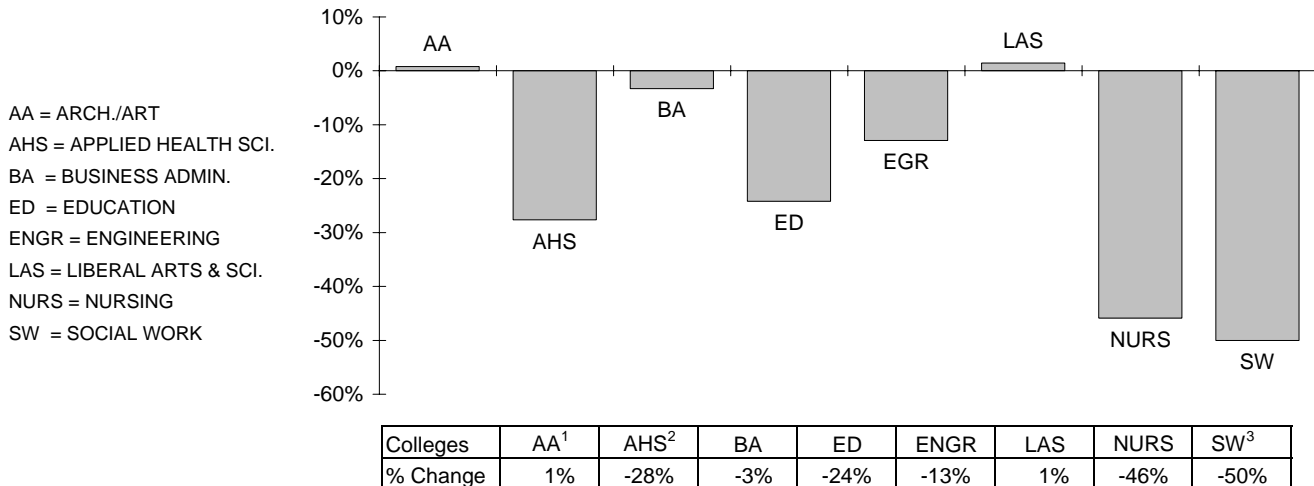

Figure 3

¹ In 1995, Architecture, Art, and Urban Planning changed to Architecture and the Arts. Urban Planning is now a part of Urban Policy and Public Affairs in the Graduate College.

² Effective fall 2001, the College of Health and Human Development Sciences was changed to the College of Applied Health Sciences.

³ The Jane Addams College of Social Work suspended admission to the BSW program effective Fall 2004.

Figure 7
Percent Distribution
of Undergraduate Enrollment
by College and Gender
1994 and 2004

¹ In 1995, Architecture, Art, and Urban Planning changed to Architecture and the Arts. Urban Planning is now part of Urban Planning and Public Affairs in the Graduate College.

² Effective Fall 2001, the College of Health and Human Development Sciences was changed to the College of Applied Health Sciences. Beginning with the fall of 1987, Pharmacy program was reclassified as professional.

New Student Characteristics

UIC

HIGHLIGHTS

- *Enrollment of new freshmen is up 7.4 percent over fall 1994, but down for the second year from the very large class of 2002. New freshmen enrollment in Liberal Arts and Sciences, the largest college, is essentially the same compared to ten years ago; enrollment in both Architecture & Arts and Applied Health Sciences are up compared to ten years ago by nearly double and nearly triple, respectively – in part due to large increases this fall. See Table 12 and Table 12.1.*
- *New transfer enrollment has decreased from a high of 2,080 in 1994 to 1,386, a 32.9 percent decrease, but an increase of 141 students compared to last year's ten-year low. The largest number of transfers entered the largest college, the College of Liberal Arts and Sciences, which enrolled more than 200 new transfers more than last year's ten-year low. The Jane Addams College of Social Work is no longer accepting new undergraduates. See Table 13 and 13.1.*
- *At 23.1, the average American College Test (ACT) composite score for 2004 beginning freshmen continues to be several points higher than the Illinois average (20.3) and the campus average of ten years ago (20.9). After a mean high school percentile rank of 76.7 in 1999 and 76.0 in 2000 and 2001, the mean dropped slightly the last three years to 74.9 in Fall 2004. See Tables 14 and 15 and Figures 14 and 15.*
- *Tables 16-18 present selected demographics of the fall 2004 beginning students, and geographic characteristics such as origin, residency, and transfer institution are mapped in Figures 16-18.*
- *Beginning freshmen are somewhat older on average than were students entering five years ago. The class is somewhat more diverse and has slightly higher female representation. See Table 16.*
- *The Chicago area continues to be the main source of new students—supplying 92 percent of the UIC new freshman (with 67 percent of the total new freshman coming from the city). Illinois residents comprise 74 percent of new graduate and professional students. See Figures 16-18.*

Academic Performance

UIC

HIGHLIGHTS

- *Retention rates, which reflect the combination of graduated and still enrolled students, illustrate attendance patterns at UIC. These tables in the current Data Book reflect an updating of enrollment and graduation data covering more than the past 10 years.*
- *Five years after matriculation, almost 40 percent of the 1999 freshman cohort have graduated, and 14 percent are still enrolled. In the eighth year, the 1996 freshman cohort, almost half (48.5 percent) have graduated and 1 percent are still enrolled. See Table 19.*
- *For the last several years, graduation rates in year four have been increasing. For example, the graduation rate in year four for the 2000 cohort was 19 percent, compared to 7 percent for the 1991 cohort. The most recent figures for fifth year graduation rates also continue to increase strikingly. Earlier cohorts have graduated at rates as low 23 percent, as opposed to the 1999 cohort, which had graduated 40 percent by the fifth year. See Table 19.*
- *At nearly 50 percent, the six-year retention rate for the 1998 cohort of all students is up compared to earlier groups. By race/ethnicity, Asian students have the highest retention (57 percent), followed by white students (49 percent), Hispanic students (45 percent), and finally Black students (33 percent). Though unacceptably low, the retention rate of Black students has climbed for cohorts who entered in the late nineties and is double what it was for cohorts from the early eighties. See Table 19 and Figure 19.*
- *First-time transfer students who matriculated to UIC in fall 1980, 1989, and 1999 are tracked for five years following transfer as shown in Table 20 and Figure 20. Thirty-three percent graduated from the 1980 cohort, 44 percent from the 1989 cohort, and 57 percent from the 1999 cohort.*
- *Retention data for the 1989 and 1999 transfer cohorts are broken down by class level in Table 21 and Figure 21. Students who transfer as juniors show higher graduation and retention rates than any other class, and the graduation rates of the 1999 cohort are higher than the 1989 cohort at each class level.*

Degrees Conferred

UIC

HIGHLIGHTS

- *In FY 2004, the campus conferred 5,790 degrees, down slightly from last year's ten-year high number, 5,810. In the last ten years, bachelor's degrees conferred are up by approximately 15 percent, and Master's degrees are up by nearly 30 percent. In contrast, the numbers of doctoral degrees conferred over the ten-year period have stayed roughly the same; 234 were awarded in FY 2004. The number of degrees awarded to first professional students has varied from year to year, but at 471, FY 2004 is a ten-year low. See Table 22 and Figure 22.*
- *Table 23 and Figure 23 display the number of undergraduate degrees conferred by college since 1994. The largest college, Liberal Arts and Sciences, granted a third more degrees this year than ten years past.*
- *Table 24 and Figure 24 report degrees conferred by level and by gender in FY 2004. Females account for approximately 57 percent of the bachelor's and Master's degrees, half the doctoral (49.6 percent), and 53 percent of first professional degrees.*
- *Tables 25 and 25.1 report the number and percent of FY 2004 degrees conferred by race/ethnicity. Overall, 45.6 percent of FY 2004 degrees were granted to White students compared to over 60 percent in FY 1994.*
- *The percentage of undergraduate degrees awarded to Black and Hispanic students combined was 22.3 percent of the total, roughly the same as the previous year. At 13.9 percent of all Master's degrees awarded, Black and Hispanic students earned a larger proportion than last year when they earned 10.3 percent. At the doctoral and professional levels, which are more volatile because of lower numbers of degrees, Black and Hispanic students earned 9.8 percent and 12.3 percent of the total degrees awarded in those categories, respectively. These proportions are down from last year's high levels of 13.1 percent of doctoral degrees and 18.4 percent of professional degrees. See Tables 25 and 25.1 for FY 2004 figures. (Figures for FY 2003 are found in the 2003 Data Book.)*

DATA SOURCE: 2004, Research Data Base: UOAPA

Campus Enrollments

UIS

HIGHLIGHTS

- *Total headcount enrollment at Springfield, 4,396, is down from last year's high point, and approximately the same as the campus' enrollment ten years ago. Undergraduate enrollment dropped from last year's level, but at 2,507 is higher than the late nineties' levels. The fourth class of Capital Scholars is the smallest so far at 90. This fall 555 new transfer students entered UIS, a lower number than entered the last three years, but similar to the number for 2000. Like last year, continuing undergraduate enrollment is higher than in other recent years. New doctoral students continue to be few. New master's students are down from last year's very large class by almost 30 percent, but higher than the small 2002 class. See Tables 26-27 and Figure 25.*
- *Total enrollment comprises 2,507 undergraduate students, 1,874 master's students, and 15 doctoral students. See Table 26 and Figure 25.*
- *Table 28 and Figure 26 show a large increase in undergraduate enrollment in the College of Liberal Arts and Sciences compared to 1994, and decreases in Business and Management and Education and Human Services. Though campus enrollment is roughly the same in 2004 as it was in 1994, some changes in college enrollments are the result of programs being moved among colleges.*
- *Fall 2004 enrollment by college, by level, and by gender is displayed on Table 29 and ten-year trends by gender and level are shown in Table 30 and Figures 27-28. Campus-wide during the period, females have outnumbered males; this year females comprise 60 percent of undergraduates and 57 percent of graduates.*
- *Undergraduate enrollment of Black students has generally risen over the ten-year period, and in 2004 is at the highest number and proportion in the period; this year 211 undergraduates, or 8.4 percent, are Black. At the Master's level, Black student enrollment is down from last year; now 125 Master's students, 6.7 percent, are Black. See Tables 31-34 and Figures 29-31.*
- *Figures 32 and 33 display the geographic distribution of Illinois students at UIS. More than 90 counties in Illinois are represented, though most students reside in Sangamon County at the time of their application. Table 35 shows that 211 international students come to UIS from approximately 30 different countries. International student enrollment is up by 38 students from last year.*
- *UIS has a growing online program; serving nearly 1,300 students, exclusively online (about three-fifths of all online students) and online/campus students represent an increasing proportion of UIS students. See Table 36 and Figure 34.*

**Percent Change in UIS Undergraduate
Enrollment by College
Fall 1994 and Fall 2004**

B&M = BUSINESS & MGT.
EHS = EDUCATION AND HUMAN SERVICES
LAS = LIBERAL ARTS & SCIENCES
PAA = PUBLIC AFFAIRS & ADMIN.

Figure 26

Some portion of the changes in enrollments by college over time is a result of programs moving between colleges.

¹ In 1999 the Nursing program was moved to SIU-Edwardsville.

New Student Characteristics

UIS

HIGHLIGHTS

- *This year's incoming freshman class of Capital Scholars, at 90, was the smallest in the four-year history of the program. Most students (87) are from Illinois, and 17 percent are from Sangamon County. This year's class is similar to the inaugural cohort of 2001 on a number of metrics. The 2004 mean ACT Composite score is 25.1, down from 26.2 last year. The mean high school percentile rank is also similar to 2001 at 79.4, but down slightly from last year's 81.0. This year, over 60 percent of new freshmen are female. The current cohort is more diverse in race/ethnicity than previous cohorts; 80 percent are White, and nearly 8 percent are Black. See Table 37 and Figure 35.*
- *Down from the last three years, this fall 555 new transfers enrolled. Due in part to organizational changes, from 1994 to 2004, the number of transfer students entering Liberal Arts and Sciences has nearly tripled. In addition to restructuring, since the closing of the Nursing program in 1997, the College of Education and Human Services enrolls few transferees. See Table 38.*
- *Table 39 displays selected demographic statistics of fall 2004 new transfer students. Over a quarter of these students are aged 30 and over, a slightly higher proportion than in 1999. Over 55 percent are female, a closer gender balance than in previous years when over 60 were female. Racial/ethnic diversity is greater, with 12.0 percent Black, Hispanic, and Native American (compared to 8.6 percent in 1999). Almost 30 percent transfer from Springfield's Lincoln Land Community College. Full-time students comprise 64 percent of new transfers.*
- *The map in Figure 36 shows the number of new transfer students in 2004 by the Illinois community college last attended and Table 40 shows the five-year trend in new transfer enrollment by sending institution. Students transferred from three-quarters of Illinois' community colleges in 2004. Lincoln Land is the largest feeder at 161 students, followed by Illinois Central at 50 and Richland at 29. These same institutions have consistently been the top feeder schools, sending 931, 258, and 137 students, respectively, over the past five years. Springfield College (now a private four-year institution, so no longer included in Figure 36) and Parkland College are also major feeders, sending 22 and 20 students, respectively, in 2004.*
- *About 70 percent of new graduate students are over 24 years old. Ten percent are Black and Hispanic students, and 13 percent are of international origin. Approximately 60 percent are part-time students, and 57 percent are female. See Table 41.*

Non-Degree Seeking	12	0	--
Undecided/Deg.-Seeking	34	0	--
	594	555	(6.6)

Some portion of the changes in enrollments by college over time is a result of programs moving between colleges.

¹ In 1994, Labor Relations moved from the School of Business and Management to the School of Public Affairs and Administration.

² Clinical Laboratory Sciences and Psychology moved from the School of Health and Human Sciences to the School of Liberal Arts and Sciences in 1997. In 1999 the Nursing program was moved to SIU-Edwardsville and the College was renamed the College of Education and Human Services.

DATA SOURCE: 2004, IPEDS & Institutional Studies Office

Academic Performance

UIS

HIGHLIGHTS

- *Table 42 displays the extended attendance patterns of undergraduate students at UIS, many of whom study part time. Five years after beginning, 6 to 9 percent of students, who transfer to UIS primarily as juniors, are still enrolled. After eight years, approximately 55 to 60 percent have graduated and some 2 to 5 percent are still enrolled. The proportion graduated at four, five, seven, and eight years out for the most recent cohorts for which numbers are available has been higher than the respective previous cohort's graduation rate.*
- *Retention rates by school vary from year to year, but a snapshot of a single class shows a five-year graduation rate for the 1989 cohort of 51 percent in the College of Business and Management, 58 percent in the College of Education and Health Services, 60 percent in the College of Liberal Arts and Sciences, and 54 percent in the College of Public Affairs and Administration. See Table 43.*
- *FY 1992 - FY 1994 graduates are aggregated in the display on Table 44 by the major in which they entered and the major in which they earned a degree. The vast majority of students earn a degree in the same major in which they begin at UIS. Of those who do change majors, graduates more often move to Child, Family, and Community Services; English; or Economics.*

2000		79.4	74.4	70.8				
2001		80.0	71.5					PERCENT
2002		79.4						RETENTION

Fall beginning transfers include new full-time and part-time students entering either in the fall or summer preceding the fall term. The cohort includes degree-seeking students only; however, the definition used in this table (and in the next table, Table 43) is more inclusive than displayed in the other sections of this publication. Also please note that Table 42 includes degree-seeking students who are not enrolled in a college (undecided), while Table 43 excludes these students. "Enrolled" includes students enrolled anytime during the entire fiscal year; these data do not portray a snapshot of fall term enrollment only. Degrees granted during the summer term are counted with the subsequent fall. Thus, a student earning a baccalaureate degree in the summer following the second year after matriculation would be counted as graduated in the third year.

Table 42 illustrates that some students at UIS are enrolled well beyond the traditionally expected two years for junior-level transfers. For example, four years after entering UIS, upwards of 10 percent of the cohort are still enrolled. Eight years after entering, some 2 to 5 percent are still enrolled. Graduation rates after eight years approach or exceed 60 percent.

The following graph depicts the percentage still enrolled, graduated, and no longer enrolled of the 1998 cohort for the second through sixth years following matriculation. After two years, approximately 20 percent of the students had graduated, with 56 percent enrolled. By the sixth year following matriculation, 60 percent of the cohort had graduated, and almost 4 percent were still enrolled.

Degrees Conferred

UIS

HIGHLIGHTS

- *In FY 2004, UIS conferred 625 undergraduate degrees, similar to the numbers awarded in recent years, but 7 percent lower than the number of bachelor's degrees awarded ten years ago. Master's degrees conferred were up by over 70 in FY 2004 compared to last year; at 453, the number is the ten-year high. At 1,079, total degrees granted was up considerably from last year's total of 991, and is the highest number in the ten-year period. See Table 45 and Figure 38.*
- *Liberal Arts and Sciences conferred more degrees and posted a larger ten-year increase than did the other colleges at the bachelor's level (due in part to the movement of programs among colleges). At the master's level, Business and Management granted the highest number and showed the largest percent increase. Compared to the previous year, all colleges other than Public Affairs and Administration granted more Master's degrees, and all colleges granted more than 10 years ago. Reorganization of the colleges may explain some of the changes in the numbers of degrees awarded during the period displayed in Table 45.*
- *Table 46 shows degrees conferred by gender. Females receive the majority of degrees awarded in every college and at each level, except for master's degrees awarded in the College of Business and Management. Females received 62 percent of bachelor's degrees awarded in FY 2004 (compared to 67 percent of the bachelor's awarded in 2003, continuing a trend toward gender parity) and 57 percent of master's degrees (compared to 56 percent in 2003).*
- *Tables 47 and 47.1 show the number of degrees conferred by race/ethnicity. In FY 2004, White students received 82.9 percent of degrees conferred (compared to 86.7 percent of those conferred in FY 2003) and Black or Hispanic students received 10.2 percent (compared to 7.4 percent of those conferred in FY 2003). Though representing 2.3 percent of all degrees awarded, nearly twice the number of Asian/Pacific Islander students received degrees in FY 2004 than ten years ago, (25 in FY 2004 compared to 13 in FY 1994).*

**Percent Change in UIS Baccalaureate and Masters
Degrees Conferred by Level and College
FY 1994 and FY 2004**

Figure 38

A portion of the change in degrees conferred by college is a result of the movement of programs from one college to another.

¹ In 1994, Labor Relations moved from the School of Business and Management to the School of Public Affairs and Administration.

² In 1997, Clinical Laboratory Sciences and Psychology moved from the School of Education and Human Services to the School of Liberal Arts and Sciences. In 1999, the Nursing program was moved to SIU-Edwardsville.

Campus Enrollments

UIUC

HIGHLIGHTS

- *This fall, total enrollment at Urbana reached 39,545, the highest point in the decade, and after two falls at the highest enrollment up to that time. Undergraduate enrollment has risen steadily over the last ten years but moved sharply up in 2004 to 29,287, some 700 students more than last fall. Graduate enrollment fell during the 1990s, but has climbed since 2000 to number 9,188, a few students less than last year. Professional student enrollment has held steady over the decade, though this year's enrollment (1,070) is slightly higher than last year's. See Table 48 and Figure 39.*
- *New freshmen numbers rose sharply again this year, following last year's large increases. This year's new freshmen class of 7,237 is a new high, larger by 25 percent than the 1994 class. New transfer numbers are again lower this fall. See Table 49 and Figure 40.*
- *Table 50 and Figure 41 show that fall 2004 undergraduate enrollment is higher in most colleges than it was ten years ago. Table 51 displays fall 2004 graduate enrollment by college, level, and gender. In previous years, the College of Liberal Arts and Sciences enrolled the highest numbers of graduates, but this fall it was Engineering that enrolled the most students.*
- *Figures 42-45 and Tables 52-53 illustrate trends in enrollment by gender. Males continue to outnumber females in the undergraduate and graduate populations; however, these gender gaps are smaller than they were ten years ago. Since the early nineties, Urbana has enrolled more female than male professional students, a gap that continued to widen until this year.*
- *In 2004, Black and Hispanic students represent 11.5 percent of all students — 13.3 percent of undergraduates, 6.7 percent of graduate students, and 10.2 percent of professional students. While the representation of Black students was steady over the period and the percentage of Hispanic students rose slightly, International students are higher again by half. Asian professionals also increased dramatically. See Tables 54-55 and Figures 46-49.*
- *With over 18 percent Black and Hispanic students, Applied Life Studies and Liberal Arts and Sciences are the most diverse undergraduate colleges. Table 56 also shows that the College of Law enrolls a diverse student body with 15 percent Black and Hispanic students. Black and Hispanic graduate students enroll in Education predominately, at over 19 percent. See Table 57.*
- *Table 58 and Figures 50-51 show geographic origin. In-state students in 2004 represent 4 percentage points less than 1994 (92 to 88 percent).*

**Percent Change in UIUC Undergraduate
 Enrollment by College
 Fall 1994 and Fall 2004**

Figure 41

¹ In 1995, the College of Agriculture changed to the College of Agriculture, Consumer and Environmental Sciences.

² As of 1997 the School of Social Work no longer accepts undergraduates.

³ As of 1997, students in secondary education enroll in the teaching option in LAS and minor in secondary education. In addition, admission to the elementary and early childhood curricula is limited to students earning 60 hours or more.

⁴ In 2003, the College of Commerce and Business Administration (CBA) changed to the College of Business (BUS).

⁵ 2004 Campus Total includes 4 students coded as Continuing Education.

In 2004 the definitions of Grad I and Grad II are based on the students' program, master's and doctoral, respectively. In previous years, the definitions were based on hours earned, fewer than eight units for Grad I and eight or more units for Grad II.

¹Three female non-degree students coded as Graduate College are included in the Campus Total.

DATA SOURCE: Planning & Budgeting Census Snapshot

New Student Characteristics

UIUC

HIGHLIGHTS

- *At 7,237, the 2004 freshman class is the largest of the past ten years, some 1,000 students larger than 2001 and 26 percent greater than ten years ago. See Table 59.*
- *Beginning freshman enrollment in 2004 compared to ten years ago is higher in most colleges. The largest college, Liberal Arts and Sciences -- almost half again as large as in 1994 -- has added more than 300 students per year for the last three years. The second largest college, Engineering, enrolled virtually the same number of new freshmen as last year. See Table 59.*
- *Table 60 and 60.1 show that 2004 new transfer enrollment (952 students) is almost 30 percent lower than 1994, dropping below 1,000 for the first time in the period.*
- *UIUC continues to attract top high school graduates, as illustrated in Tables 61 and 62 and Figures 52 and 53. However, the reader is warned that a new methodology and data collection was used this year, so the data may not be comparable across years. The mean high school percentile rank for new freshmen in 2004 is 86.6 after three years above 87.0. The mean ACT composite score for 2004 freshman is 27.5, which, like the last two years, is higher than earlier years in the period and more than seven points above the state average.*
- *Tables 63-65 present selected demographics of the fall 1999 and 2004 new students. Parkland College (207) and the College of DuPage (45) send the largest numbers of transfer students to UIUC.*
- *Geographic characteristics such as origin, residency, and transfer institution are mapped in Figures 54-56. Cook County (2,496) and the five collar counties of the Chicago metropolitan area (2,169) provide the largest number of beginning freshmen; however, large numbers of students come from several downstate counties—Champaign (250); McLean (109); Peoria (99); Sangamon (94); and Madison and St. Clair (171 combined). Only five counties did not send students to UIUC.*
- *Geographic origin in the U.S. is illustrated in the maps of Figure 56. Eighty-nine percent of new freshmen in 2004 came from Illinois compared to 36 percent of new graduate and professional students.*

¹ In 1995, the College of Agriculture changed to the College of Agriculture, Consumer and Environmental Sciences.

² As of 1997, students in secondary education enroll in the teaching option in LAS and minor in secondary education. In addition, admission to the elementary and early childhood curricula is limited to students earning 60 hours or more.

³ In 2003, the College of Commerce and Business Administration (CBA) changed to the College of Business (BUS).

¹ In 1995, the College of Agriculture changed to the College of Agriculture, Consumer and Environmental Sciences.

² In 2003, the College of Commerce and Business Administration (CBA) changed to the College of Business (BUS).

³ As of 1997, students in secondary education enroll in the teaching option in LAS and minor in secondary education. In addition, admission to the elementary and early childhood curricula is limited to students earning 60 hours or more.

⁴ As of 1995, The School of Social Work no longer accepts undergraduates.

Academic Performance

UIUC

HIGHLIGHTS

- *One-year retention rates by college are reported in Table 66 and Figure 57. Overall, over 92 percent of the 2003 freshman class returned after the first year.*
- *Table 67 tracks the mean grade point averages for the 1987 transfers from community colleges and four-year institutions for six semesters after transfer. The community college transfers dropped over one-half of a grade point the first semester, but the group average improved in the succeeding terms.*
- *Graduation and retention patterns are reported in Tables 68-69 and Figure 58 for beginning freshmen. The seven-year graduation rate for the 1997 cohort, 81 percent, is higher than that of any of the five immediately previous cohorts. The five-year trend has moved higher for several years; at approximately 78 percent, the most recent cohorts (1997-1999) are as much as 4 percentage points higher than those that entered in the early nineties. The percentage graduated in five years for the 1999 cohort exceeds the seven-year graduation rate for some earlier cohorts.*
- *Table 69 demonstrates that women succeed at a higher rate than men and on average men are enrolled longer than women. For the cohort that started in 1999, women graduated at 82 percent five years after matriculation, compared to a rate of less than 75 percent for men. However, almost 4 percent of men were still enrolled compared to just over 1 percent of women.*
- *For transfers, the graduation rate after four years for the fall 1991 cohort is almost 70 percent including about 1 percent still enrolled. See Table 70.*

Table 67

**UIUC COMMUNITY COLLEGE AND FOUR-YEAR COLLEGE TRANSFER STUDENT
PERFORMANCE AS MEASURED BY CUMULATIVE GRADE POINT AVERAGES
FALL 1987 COHORT**

	Number in Cohort	Transfer GPA	GPA At End Of Term					
			1	2	3	4	5	6
Two-Year Transfers	741	3.26	2.72	2.83	2.86	2.97	2.92	2.76

	Number in Cohort	Transfer GPA	GPA At End Of Term					
			1	2	3	4	5	6
Four-Year Transfers	466	3.15	2.86	2.98	3.01	3.08	2.99	3.03

Reported above are enrollments and mean cumulative grade point averages for the fall 1987 cohort of new transfers to UIUC. This cohort was tracked for three years after transfer.

In fall 1987, 741 students from community colleges transferred to UIUC entering with a mean cumulative GPA of 3.26. After one semester, the mean GPA for this cohort dropped to 2.72. At the end of four semesters, or two years after transfer, the mean GPA for this cohort had increased to 2.97.

In fall 1987, 466 students from four-year colleges and universities transferred to UIUC, entering with a mean cumulative GPA of 3.15. At the end of one semester, this cohort's mean GPA dropped to 2.86, a smaller decrease than experienced by the community college cohort. At the end of four semesters, or two years after transfer, the mean GPA for this cohort increased to 3.08.

2001		91.2	86.1				RETENTION
2002		91.6					

Fall beginning freshmen include full-time freshmen entering in the summer preceding the fall term. The percentages in column "Year Two," and so on, reflect the percentage of students enrolled but not graduated during the second year, the cumulative percentage of degrees conferred through that year, and the retention for the second year -- the sum of enrolled and graduated students. These data might incur rounding error. The data used in the table are taken from the statistics used to compile the AAUDE Retention and Graduation Survey. Students not enrolled in Fall term but who received a degree during the AY will not show in the top table; this is particularly noticeable comparing year 6 to year 7.

Year-to-year retention for the 1997 cohort is displayed in Figure 58 on the next page. Of those freshmen who entered UIUC in fall 1997, less than one-half percent were still enrolled and over 81 percent had graduated after seven years, to yield a retention rate of 81.4 percent.

Figure 58

1992		74.6	70.2	68.5	
1993		75.8	69.9		
1994		78.4			PERCENT RETENTION

Fall new transfers include full-time transfers entering in the fall term. Summer degrees are counted with the previous spring. The percentages in column "Year Two," and so on, reflect the percentage of students enrolled (those who did not graduate and did not drop out) during the second year and the cumulative percentage of degrees conferred through the second year. Retention for the second year is the sum of enrolled and graduated students. These data might incur rounding errors.

UIUC New Transfers Retention Patterns for 1990 Total Cohort

Figure 59

UIUC New Transfers Retention Patterns for 1990 Major Feeder Cohort¹

Figure 60

¹ Major Feeder Cohort includes new transfers from Parkland, Illinois Central, DuPage, Moraine Valley, and Wm. R. Harper. The transfers from these schools comprise slightly less than one quarter of all new transfers.
DATA SOURCE: 1997, Summary of Progress: UOAPA

Degrees Conferred

UIUC

HIGHLIGHTS

- *In FY 2004, the campus conferred 10,342 total degrees, an increase of over 700 from ten years ago, though some 300 less than one year ago. At 6,763 bachelor's degrees, FY 2004 is higher than 1994 by 12 percent. Master's were awarded to nearly the same number of students as last year. The number of doctoral degrees granted has declined compared to ten years ago, now at the lowest point in the ten year period, while the number of professional degrees is higher in recent years than the earlier in the period. See Table 71 and Figure 61.*
- *As presented in Table 72 and Figure 62, most colleges awarded larger numbers of undergraduate degrees in FY 2004 compared to ten years earlier. Though most colleges show increases versus a decade ago, they awarded fewer degrees than last year.*
- *The percentage of undergraduate degrees earned by females has increased over the decade. For several years, about 45 percent of undergraduate degrees went to female students. Six years ago the rate increased to 46 percent, and three years ago it went to 47 percent. Last year 49 percent of undergraduate degrees were awarded to females, then this year the percentage fell back to 48 percent. See Table 73.*
- *Tables 74 and 74.1 report undergraduate degrees conferred by race/ethnicity. The percentage distribution of undergraduate degrees conferred to underrepresented students has increased over the last ten years. The proportion of degrees conferred to minorities (American Indian, Black and Hispanic students combined) moved up from 9.2 percent of total bachelor's degrees ten years ago to 10.8 percent in FY 2004.*
- *Data are also presented showing the number of degrees conferred by level and race/ethnic category with international students displayed in a separate category (See Tables 75 and 75.1). In FY 2004, minority students received 10.8 percent of bachelor's degrees, 5.3 percent of Master's degrees, 4.9 percent of doctoral degrees, and 12.3 percent of professional degrees.*

% Change	12%	4%	-14%	8%

Figure 61

¹ The decline in the number of certificates in Aviation occurred because beginning in Fall 1999, the Institute of Aviation began offering a baccalaureate degree in Aviation Human Factors.

² The percent changes are not shown for the pre-baccalaureate and advanced certificate degrees because the small numbers awarded may result in large percent changes that are not meaningful.
